

33rd floor energy storage building

What is thermal energy storage?

Thermal energy storage (TES) is a critical enabler for the large-scale deployment of renewable energy and transition to a decarbonized building stock and energy system by 2050.

What are the benefits of thermal energy storage?

Advances in thermal energy storage would lead to increased energy savings, higher performing and more affordable heat pumps, flexibility for shedding and shifting building loads, and improved thermal comfort of occupants.

How much energy does a building use?

In the United States, buildings consume approximately 39% of all primary energy and 74% of all electricity. Thermal end uses (e.g., space conditioning, water heating, refrigeration) represent approximately 50% of building energy demand and is projected to increase in the years ahead.

The 2.3 million square foot LEED® Gold building offers efficient floor plates of approximately 29,000 SF, exceptional service, and unrivaled convenience. ... Partial 33rd Floor, Suite 3325. Lease type Direct. Condition Pre-existing. Available now. ... LEED = Leadership in Energy and Environmental Design. Having a green-friendly building is ...
