Why should you attend Energy Storage Summit Asia?

Every country in the region has the power to spur on the transition and deploying more energy storage will play a huge part in this. Energy Storage Summit Asia promises a diverse and exciting event filled with investors, developers, policy-makers, solution providers and networks who will help guide you in the right direction.

Where are battery energy storage systems coming from?

Across the Asia-Pacific region, after China and perhaps South Korea, the most mature market for standalone battery energy storage system (BESS) technologies is Australia. That market has grown quickly because big power generators and retailers like AGL have offered long-term contracts for capacity or grid services to developers in some cases.

How much power does a battery storage asset have?

The first two battery storage assets to begin trading power on the Japan Electric Power Exchange (JEPX) spot market are sized at 2MW/8MWh each, for example, and even among larger projects announced in the months since, anything above 100MWh is rare.
