

Cape town energy storage development plan

How is Cape Town transforming the energy system?

City of Cape Town Draft for Public Participation June 2023 Executive Summary The energy system, globally and locally, is rapidly transforming due to the impacts of technology change, regulatory change, and climate change. These changes

What is Cape Town's energy strategy?

CITY OF CAPE TOWN FOREWORD FROM THE EXECUTIVE MAYOR With this Energy Strategy, Cape Town is charting the long-term path to 2050, as we make the great transition from centralised supply of unreliable, costly and fossil fuel-based Eskom energy, to an increasingly decentralised supply of reliable, cost-effective, carbon

Where can I find information about Cape Town's energy system?

energy system, in response to current City mandates and data availability. The City of Cape Town has a wealth of energy data that is captured in the State of Energy & Carbon Report (2021) and available through the City's Open Data Portal. For a more in-depth description of the current

Will Cape Town release an RFP for 100MW battery energy storage?

The City of Cape Town will, in the third quarter of this year, release an RFP for 100MW of battery energy storage systems in an effort to bolster energy security.

What is Cape Town's economic development strategy?

The City's Economic Development Strategy cites lower carbon city development as a key economic driver, and recognises that in order for Cape Town to be economically competitive it needs to be able to offer investors resource-efficient and lower carbon opportunities.

How does the city of Cape Town deal with the energy crisis?

City resources are used in such a way so as to achieve maximum public benefit. However, the City of Cape Town cannot operate in isolation to address the current energy crisis and navigate the energy transition, but rather operates within a system of energy actors. Working with a network of partners in government and the private sector is critical for

CITY OF CAPE TOWN SUPPLY AREA - GEOGRAPHIC LOCATION City of Cape Town Currently purchases 99%+ of its electricity from Eskom for onward sale to consumers in the City's grid. 44 Energy Intake points 10 TWh consumption per year (10 x 1000 000 MWh) 1650 MW combined maximum demand Eskom supplies approximately 25% of the metro's ...
