

Will Cape Verde get 100% of its electricity by 2025?

As part of its "sustainable energy for all" agenda, it has pledged to obtain 100% of its electricity from renewable resources by 2025. Cape Verde is made up of 10 islands, nine of which are inhabited, that lie about 600km west of Senegal.

Are Cape Verde communities using a solar and wind-based micro-grid?

At least three communities in Cape Verde are already using a solar and wind-based micro-grid. A microgrid is a local electricity grid. It includes electricity generation, distribution to customers, and, in some cases, energy storage.

Does Cape Verde have solar power?

Like many African countries, Cape Verde's tropical location has good potential for solar photovoltaic (PV) electricity. One study suggests that the solar PV capacity potential is more than double the currently installed electrical generating capacity. Most of the potential development is on the densely populated island of Santiago.

Is Cape Verde a developing state?

The archipelago of Cape Verde is a developing state in West Africa with extreme external energy dependency on refined oil imports despite their available solar and wind resources. Aligned with the global energy transition, the local government established goals in 2011 aiming at 50 and 100% RES.

Does Cape Verde have a wave energy potential?

In the case of Cape Verde, there is one study evaluating the wave energy potential which highlights the resource available, particularly for the northern islands, such as S#227;o Vicente . Unfortunately, the study identifies the wave resource to match that of the wind.

What technology could be integrated into Cape Verde's electricity generation offering?

Another technology that could be integrated into the electricity generation offering is the country's desalination systems. Many of Cape Verde's communities depend partially, or entirely, on these for drinking water.

The German government has opened a public consultation on new frameworks to procure energy resources, including long-duration energy storage (LDES). Under the proposed Kraftwerkssicherheitsgesetz, loosely translated as the Power Plant Safety Act, the Ministry for the Economy and Climate Change (BMWK) would seek resources, including 12.5GW of ...
