Ask any horse racing expert (or any horse), such conditions are very bad news for the favorite's (horses given the best odds to win) in any horse race. Unlike on days when track conditions are "fast" -- meaning dry, oftentimes dry enough that it requires watering in-between races -- when betting on one of the favorite's is generally the ...

Dark Horse is designed to remove and dispose of the hydrogen sulfide and carbon dioxide contaminants so the rest of the gas can be sold. The company markets itself as the largest such project in New Mexico. Dark Horse's anchor shipper is Ameredev II, a private-equity backed driller that's one of New Mexico's top 25 oil producers.

While the 2024 Ford Mustang Dark Horse offers a track-happy manual gearbox and produces more horsepower than the C8 Chevrolet Corvette Stingray, the "Vette is in a different category altogether. With mid-engine construction and 0 to 60 mph times under 3.0 seconds, the Stingray is more of a supercar than a performance coupe akin to the Mustang.

with a massive 13.2" touchscreen.

On the Mustang Dark Horse, the lower air spoiler and splitter is unique allowing the car to be tuned for greater downforce. The upgraded handling package on the Dark Horse provides a unique splitter, spoiler, and wheels - changes that may seem small but that make all the difference when hitting the road or track with performance in mind.

The Mustang typically offers eleven colors to choose from, but the Dark Horse is slightly limited. You won't find a bright yellow Dark Horse flying around the nearest track, but that's probably a good thing. The 2024 Mustang Dark Horse definitely looks better in moodier shades.

Back to blog; Smart grids: The dark horse of European energy transition? This article was originally published in the April issue of Energy World magazine. If Covid-19 had hit ten years earlier, seamless operations and smooth energy delivery would have been much more difficult to achieve than it is today.

As the translator of the Dutch edition of *Climate Gamble* (published by Nieuw Amsterdam with the title "Nuclear Energy as a Chance") I was particularly curious whether the new book by Rauli Partanen and Janne Korhonen *The Dark Horse* would add any substantial arguments to "Climate Gamble" the first book of the Finnish writing duo.

After a marked improvement in energy consumption in copper smelting during the past few decades, technology development has been slowing down in the Americas and in Europe. Innovation, however, is still required to further reduce energy consumption while complying with stringent environmental regulations. The bottom blowing smelting technology ...
