

Cleaning and Restoration. Plus Mold, Mildew and Stain Removal - Microfiber cushion covers in washing machine? - Hi all.. rst post here I have a medium-beige microfiber sofa and loveseat that are about 1.5 years old, and they're starting to get a tad dirty. I know I can use mild soap and water for spot cleaning, but I"

If a cardboard box used for storage has been affected, check all the items inside for mold, then repack them in a different box. Trying to clean the box itself isn't worth the effort. Besides, the fact that it had mold means that it has gotten damp at some point even if it isn't at the moment, and the structure itself has been weakened.

Mold exists everywhere -- in the air, in the dirt, in our homes and yes, in our washing machines. Mold spores travel great distances, hitchhiking on a breeze or a soft cashmere sweater. When they settle on something damp, they start to grow. It's nearly impossible to get rid of mold. Molds eat building materials like wood, drywall and paint, and they destroy everything ...

The mold spores will not grow if moisture is not present. Indoor mold growth can and should be prevented or controlled by controlling moisture indoors. If there is mold growth in your home, you must clean up the mold and fix the water problem. If you clean up the mold, but don't fix the water problem, then, most likely, the mold problem will ...

4. Washing Practices: High-temperature washes: Wash loads in hot water periodically to kill bacteria and prevent mold growth. Run an empty cycle: Run an empty cycle with hot water and a cup of baking soda to remove any residual detergent or fabric softener. 5. Tackling Existing Mold: Clean with bleach: For severe mold infestations, use a bleach solution (1/2 cup bleach to 1 ...
