

A gravity battery is a type of energy storage device that stores gravitational energy--the potential energy  $E$  given to an object with a mass  $m$  when it is raised against the force of gravity of Earth ( $g$ ,  $9.8 \text{ m/s}^2$ ) into a height difference  $h$ . In a common application, ...

However, for all the benefits of pumped hydro, the technology remains geographically constrained.
