Does neovolta have a nv24 battery add-on?

(OTCQB: NEOV) - NeoVolta has dramatically expanded the storage capacity of its NV14 home solar battery with the new NV24 battery add-on. Pairing the NV14 with the NV24 increases storage capacity from 14.4 kilowatt-hours to 24.0 kWh, making this one of the highest-capacity home solar storage systems on the market.

How long does neovolta nv14 battery last?

Effective June 15, 2021, NeoVolta's advanced NV14 energy storage system will feature a 6,000-cycle lithium-iron phosphate battery. This represents a 50% longer life than the original 4,000-cycle product. According to the company, the improved NV14 should last 16.5 years under daily cycling.

How many cycles does a neovolta nv14 have?

NeoVolta's NV24 add-on battery, which can be used to expand the NV14's storage capacity, has also been upgraded to 6,000 cycles. "For any homeowner who invests in energy storage, maximizing cycle life is of the utmost importance," said CEO Brent Willson, CEO of NeoVolta.

How many kWh can a neovolta nv14 store?

NeoVolta's NV14 can store 14.4 kWh of electricity, which is about enough to cover the average American household's daily energy usage. Most solar batteries on the market today have a power capacity between 10 kWh and 15 kWh. NeoVolta's 14.4 kWh storage capacity falls on the higher side of average for lithium-ion solar batteries.

Who is neovolta?

Founded to provide reliable, sustainable, and high-performance energy storage systems, the company has quickly established itself as a critical player in the industry. NeoVolta's flagship products are designed to meet the growing demand for efficient energy management in residential and commercial applications.

What is neovolta's primary residential battery?

NeoVolta's primary residential battery is the NV14. Let's take a closer look at what features the NV14 has to offer: AC or DC-coupled? NeoVolta has an additional battery model called the NV24. When you install an NV24 system, you install one NV14 battery plus an additional 9.6 kWh battery (AKA the NV24).

The residential-focused NeoVolta NV14 is equipped with a solar rechargeable 14.4 kWh battery system, a 7,680-Watt inverter, and a web-based energy management system with 24/7 monitoring. The system's 6,000-cycle battery life, one of the longest on the market, translates to 16.5 years of useful life, based on a full charge, and discharge each day.
