What challenges do solar and wind companies face in Panama?

Despite abundant renewable energy resources, solar and wind companies in Panama face economic challenges, given that the current power market model is based on conventional sources such as thermal and hydropower generation and does not recognise the unique operating characteristics of variable renewable energy (VRE) generation.

How much energy does Panama use?

Consumption reached 2 816 kboe in 2014 (Figure 5). Since 2010, the sector has accounted for about 15% of total final energy consumption in Panama, and its electricity consumption has maintained an annual average growth rate of 6.2% (Figure 9).

How can Panama adapt its energy system?

To adapt Panama's energy system to this evolving paradigm, a comprehensive plan is needed that considers a rapid growth in demand from the electrification of transport, including from the introduction of expanded metro lines, electric passenger vehicles and electric buses.
