

However, the nation's abundant renewable energy resources, such as solar, wind, and hydropower, present a unique opportunity to transform its energy market and pave the way for sustainable development. One of the primary reasons for São Tomé and Príncipe's reliance on fossil fuels is the lack of a robust energy infrastructure.

6 ELECTRIFICATION WITH RENEWABLES EXECUTIVE SUMMARY Access to affordable, reliable and modern energy is essential for the delivery of quality health services, whether that is to power critical life-saving equipment, such as incubators and lighting in labour rooms, or basic diagnostics and administrative needs.

Electricity net generation of Sao Tome and Principe rocketed by 25.52% from 0.11 billion kilowatthours in 2021 to 0.14 billion kilowatthours in 2022. The amount of gross generation less the electrical energy consumed at the generating station(s) for station service or auxiliaries. Electricity required for pumping at pumped-storage plants is regarded as electricity for station ...
