The situation in South Sudan, the world's newest country, is unique. It does not have any real existing energy infrastructure. The government is roiled by factionalism and corruption, and unable to control large areas of its territory, which is divided into diverging tribal groups and significant parts are difficult to access, creating an effective degree of autonomy.

Read about South Sudan's growing oil sector and more in the Africa Energy Series Special Report: South Sudan 2020 - the leading investor resource for tracking South Sudan's current and future movements within the sector. Download the extended report and other AES Special Reports here.. South Sudan's upstream energy is dominated by Asian national oil ...

The discovery of oil, mainly in South Sudan in 1998, hindered the further exploitation of solar energy as a means of producing energy on a wider scale as Sudan became heavily reliant on its oil resources in the South. In 2011, a referendum paved the way for South Sudan to declare its independence as a separate state.

Since independence, South Sudan has faced several severe episodes of fuel shortages, initially because of closure of borders with the Sudan, and more recently due to lack of local depots and refineries. First, one of the major challenges in the downstream sector in South Sudan is lack of adequate depot infrastructure. South Sudan"s demands ...
