However, it also means looking for a welding table that has foldable legs. Fixed legs, by contrast, are just as they sound - table legs that stay fixed in place and thus do not allow you to neatly store the table in the back or trunk of your vehicle as necessary. Some extra things to keep in mind when working with welding tables:

The Stored Energy welding power supply - commonly called a Capacitive Discharge Welder or CD Welder - extracts energy from the power line over a period of time and stores it in welding capacitors. Thus, the effective weld energy is independent of line voltage fluctuations. This stored energy is rapidly discharged through a pulse transformer producing a flow of electrical current ...
