This is especially true for critical applications such as industrial plants, offices, healthcare facilities, utilities, and data centers. To ensure uninterrupted power supply, uninterruptible power systems (UPS) and energy storage systems are used. UPS and energy storage systems are two different technologies that serve different purposes.

The pump storage project is a clean, green, safe & environment-friendly project that produces high-quality firm, flexible, and dispatchable power. The project does not transform/damage the riverine ecosystem. The project has a low up-front cost and the cost of power storage is also low. It is a closed-loop pump-storage project that produces low ...
